To Whom Concerned:

Project No. CSSTP-000-00(269)

Industrial Park Road Extension

This is to advise that Sunbelt Asphalt Surfaces, Inc. completed construction of the above listed project on December 8, 2010. The final contract amount was \$910476.06.

Project consisted of 0.663 miles of grading, drainage, base and paving, including two major drainage structures.

In addition to the earthwork and drainage, the project included 12 inches of graded aggregate base construction, 6 ½ inches of asphaltic concrete construction, and 1800 linear feet of guardrail.

The contractor sub-contracted the earthwork, major drainage structures, guardrail, traffic control devices, and completed the remaining items of work with their own forces and equipment. The equipment was in good working order and the personnel were well qualified for the type work accomplished.

The project was completed under budget and in a satisfactory and acceptably manner.

Habersham County would not hesitate to use Sunbelt Asphalt Surfaces, Inc. on other projects of similar type.

Sincerely,

Lewis Canup, P.E.

Habersham County Engineer
